PROFESSIONAL SUMMARY

Information Technology undergraduate with hands-on software development experience through projects and a Software Development Internship at IIIT Hyderabad. Currently strengthening skills in Python, JavaScript, React, and Django, with practical experience in React Native, REST APIs, Firebase, Supabase, and SQLite. Experienced in developing full-stack and AI-powered applications with an interest in building practical software solutions.

TECHNICAL SKILLS

Programming Languages: Python, C, C++, JavaScript
Web & Frontend: HTML5, CSS3, React.js, React Native (Expo), Tailwind CSS, Responsive Design
Backend & APIs: Django, REST APIs, Google Apps Script
Databases & Cloud: SQL, SQLite, Firebase, Supabase
Tools & Engineering: Git, GitHub, Postman, OOP, MVC Architecture, Agile Methodology

WORK EXPERIENCE / INTERNSHIPS

Smart City Research Center (SCRC), IIIT Hyderabad May 2026 – Jul 2026
Software Development Intern Hyderabad, TS

- Developed a React Native (Expo) Communication App for real-time announcements.
- Integrated REST APIs, Firebase, and Supabase for application communication and real-time data synchronization.
- Worked with ESP32/ESP8266 and LED matrix displays for API-based text display.
- Contributed to the Crowd Monitoring App by testing login, GPS/maps, navigation, incident management, SOS alerts, and family meeting points.

PROJECTS

AI-Driven Resume Builder | *Django, HTML, CSS, JavaScript, SQLite, REST APIs, Gemini API*

- Developed a full-stack resume builder with user authentication, CRUD operations, SQLite database, and PDF generation.
- Integrated the Gemini API to analyze job descriptions and provide skill improvement suggestions.

AI-Powered Mock Interview Platform | *Google Apps Script, REST API, Gemini API, HTML, Tailwind CSS*

- Developed an AI-powered mock interview platform for generating interview questions and evaluating responses.
- Integrated the Gemini API using Google Apps Script to support interview generation and performance analysis.

Automatic Railway Gate Control System | *Arduino Nano, C++, Ultrasonic Sensors, Servo Motors*

- Developed a prototype for automatic railway gate control using ultrasonic distance detection.
- Implemented C++ control logic to detect approaching objects and operate the servo motor.

EDUCATION

Aditya Institute of Technology and Management Tekkali, AP
Bachelor of Technology in Information Technology (GPA: 7.28 / 10.0) 2023 – 2027

Narayana Junior College Visakhapatnam, AP
Intermediate / Class XII – MPC (Percentage: 83.2) 2021 – 2023

Narayana High School Visakhapatnam, AP
Secondary School Certificate / Class X (Percentage: 95.83) 2021

CERTIFICATIONS

- NPTEL – The Joy of Computing Using Python (Silver Badge), 2025
- NPTEL – Database Management Systems, 2026
- APSSDC – Web Development Using Django, Jan 2025
- AITAM – Advanced UI Development with JavaScript, Sept 2024

ACHIEVEMENTS

- 1st Prize – Build-A-Thon Hackathon, AITAM (Jul 2025): Developed a functioning product end-to-end within 7 hours.
